Berkowits Can Make a Beautiful Difference in Your Life

Hair Weaving

For years this method has been availed by patrons ranging from film-stars to the everyday hunk. It offers a perfectly natural and sturdy look by weaving your natural hair together to act as an anchor to your new hair.

Hair Microweaving

An American innovation pioneered by us and often regarded as the most hassle-free option. It is a non-surgical, painless, quick and safe treatment which provides the golden combination of flexibility and an unperceivable look.

Hair Bonding

A technological marvel customized by Berkowits for that undetectable look. With today’s active lifestyle, it is the choice of many young patrons as it offers a comfort that only your own skin can offer.

Wigs for Cancer Patients

For many cancer patients, hair loss is one of the most distressing and feared side effect of chemotherapy and radiation treatment. If you don’t want anybody to know justifying your wig, wigs may be your answer. Berkowits offers both natural and synthetic hair prostheses which offer an undetectable look.

Hair Transplant

Hair transplantation is a surgical technique that involves moving hair containing hair follicles from one part of the body (the donor site) to bald or balding parts (the recipient site). It is a non-surgical, painless, quick and safe treatment which provides the golden combination of flexibility and an unperceivable look.

Treatment of Acne Scars

Acne Scars, can blemish your beauty for lifetime. Berkowits provides customized treatments including dermarollers, lasers, chemical peels and micro-dermabrasion for effective reduction of acne scars.

Treatment of Moles, Warts, Tags & Freckles

Warts, Moles & Freckles are eliminated with non-surgical chemical cautery or with electro cautery or radio frequency process with no side effects or scarring. It is painless and the number of sittings

Berkowits Can Smoothen Your Skin & Life with
Cutting Edge Laser Hair Removal Solutions

Laser hair removal is a non-invasive procedure, by which unwanted hair is removed from any part of the body by striking the area. The laser light travels through the hair to strike the root of the hair follicle. Once the follicle is destroyed, the hair will not re-grow.

Suitable for all
Both men and women seek laser hair removal. Laser removal is commonly done on the forehead, eyebrows, scalp, upper lip, sideburns, pubic area, bikini lines, arms, legs, hands, and toes.

Lasma Selective
The UK-DHA has approved this process as permanent treatment which means that one should expect laser to remove every single hair from an area. Touch up treatments may be required for some, once or twice a year after the initial set of treatments for any new growth the body may develop.

Berkowits Instant Glow
